

Early Bird

Crowdlending Protocol

FOR INVESTORS

Early Bird Crowdlending Protocol is an innovative project that provides unique opportunities for investing and borrowing funds using blockchain technology and smart contracts.

KEY FEATURES AND BENEFITS of investing in Early Bird:

- Web3 protocol allows to reduce the chain of intermediaries when obtaining loans by companies, which makes this method more efficient than in traditional finance;
- A unique opportunity to anonymously invest in potentially promising projects using the principles of crowdlending;
- Decentralized protocol using blockchain technologies, providing transparency and security of operations;
- A wide range of projects for investment, from small and medium to large business projects;
- Simplicity and ease of use through the official website of the protocol.

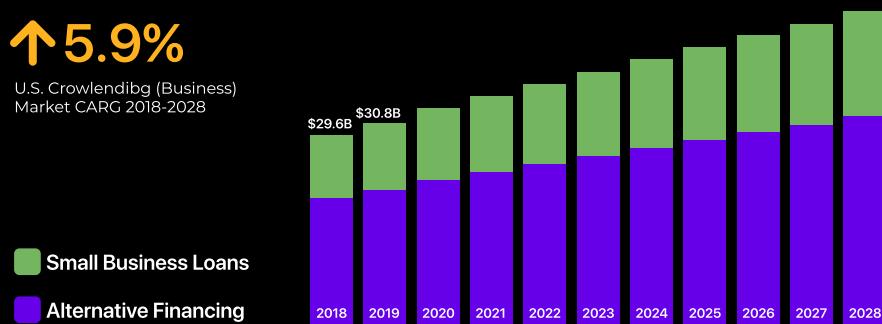

Investing in Early Bird is a unique opportunity to take part in the creation of a new economy system and receive a stable income using future technologies. Also, investing in projects that are presented on the platform can have a huge potential for growth and profit in the future.

RESEARCH OF CROWDLENDING BUSINESS

Crowdlending platforms allow a large number of people to come together to lend money to a business in the form of a loan in exchange for interests and dividends. Crowdlending is also called lending-based crowd funding. It mainly permits firms to finance themselves through a large and diverse group of individuals, without having to go to a bank. This platform has gained popularity among borrowers in the U.S. and other established markets such as the U.K. owing to their minimum interest rates, lower cost structure, and easy application process.

The global crowdlending (business) market size was valued at **USD 359.46 BILLION IN 2020** and is expected to expand at a compound annual growth rate (CAGR) of **5.5% FROM 2021 TO 2028.**
